

Industrial brick wall styling checklist

Talissa Decor - decor styling guide 2026

Plan the wall

1 Pick one feature wall

Choose the wall with the best light and a clear line of sight.

2 Choose your brick tone

Red for warmth, gray or white for a cooler, minimal loft feel.

3 Check suitability

Confirm the panel is rated for the spot, especially near heat or moisture.

4 Measure and order extra

Add a margin for cuts, corners, and future repairs.

Style the room

1 Add black metal

Shelf brackets, a pendant, or a metal-frame mirror echo the factory roots.

2 Bring in warm wood

Reclaimed-look shelving keeps the room from feeling cold.

3 Light it warm

Edison-style or 2700K bulbs flatter brick tones.

4 Layer soft goods

Leather, a knit throw, and a low-pile rug add comfort and balance.
