Nursery Indoor Air Quality Checklist

A short planning page. Follow the product page and adhesive instructions for your project.

Questions to ask before you buy

What is the board made of?

Ask for the material and the surface finish.

Is there a safety data sheet?

Request one for the board and one for the adhesive.

What documentation exists?

Ask which product and which test any emission claim covers.

Plan the work

Finish before furnishing

Install with the room empty and set aside extra days for cure time.

Ventilate during and after

Open windows on two sides when weather allows and use outdoor-venting fans.

Keep children and pets out

Keep them out of the room during the work and cure time.

Before the baby arrives

Do a smell check

If an odour remains, ventilate longer before moving furniture in.

Air the room again

Open the windows for a short, strong burst of fresh air.

Ask for help if needed

Talk to your doctor or pediatrician about health concerns.
